Putting Bees on the Map: Borders

On the Get the Buzz on Honey Bees map, borders are used to show where one place ends and another place begins. For example, a sidewalk can be considered the border between someone's yard and the street. Now that you know about borders, use the Get the Buzz on Honey Bees map to answer the questions below.

- Check the map for the states that produce apples with the help of honey bees. Do any of these states share a border? _____ If so, which ones? _____

- Check the map for the states that produce blueberries with the help of honey bees. Do any of these states share a border? _____ If so, which ones? _____
